

# ZKBioSecurity

Multi-language Version

ZKBioSecurity, the ultimate “all-in-one” web-based security platform developed by ZKTeco, can now support up to 11 language packs. The new language packs include Arabic, French, Japanese, Korean, Persian, Portuguese(Brazil), Portuguese(Portugal), Russian, Traditional Chinese, Turkish and Vietnamese. All language packs are available for ZKBioSecurity’s integrated modules, namely, access control, elevator control (online/offline), visitor management, guard patrol, hotel management, and video surveillance. With an effective system architecture designed for high-end biometric identification and a modern-user friendly UI, ZKBioSecurity with increased language packs further optimizes such brilliant comprehensive solution for advanced user experiences.
