

Quick Start Guide

BioFace C1

Version: 1.0

1 Overview

Note:

- To ensure the accuracy of fingerprint recognition, please remove the fingerprint sensor protective film before using your fingerprint.
- Not all products have the function with *, the real product shall prevail.

2 Installation Environment

Please refer to the following recommendations for installation:

GLASS WINDOWS

AVOID DIRECT SUNLIGHT AND EXPOSURE

AVOID USE OF ANY HEAT SOURCE NEAR THE DEVICE

- Avoid direct contact to sunlight for a long time.
- Protect the BioFace C1 device from moisture, water, and rain.
- Handle the BioFace C1 device with care.
- Make sure that the BioFace C1 device is not installed in close proximity to a sea or other environments where metal oxidation and rust may occur if the BioFace C1 device is exposed for a long time.
- Protect the BioFace C1 device from lightning.
- Make sure that the BioFace C1 device is not working in an acidic or alkaline environment for a long time.

3 Standalone Installation

4 Exit Button and Door Sensor Connection

5 Smoke Detection Connection

6 Power Connection

7 RS485 and Wiegand Connection

Note: The Wiegand interface is shared, and the user can choose to use either the Wiegand input or Wiegand output function to interface with different Wiegand devices.

8 Ethernet Connection

9 Lock Relay Connection

The system supports Normally Opened Lock and Normally Closed Lock.

The NO LOCK (Normally opened at Power On) is connected with "NO1" and "COM" terminals, and the NC LOCK (Normally closed at Power On) is connected with "NC1" and "COM" terminals. Take NC Lock as an example below:

-5-

10 User Registration

When there is no super administrator set in the BioFace C1 device, click \equiv icon to enter the menu. Add a new user, set their User Role to Super Admin, and the system will request administrator verification before granting access to the menu. It is strongly recommended to register a super administrator initially for security purposes.

Method 1: Register on the BioFace C1 device

Click on \equiv > User Mgt. > New User to register a new user. The options include entering the User ID and Name, Setting User Role, Registering Fingerprint*, Face, Card Number, Password and Adding Profile Photo.

12 SIP Settings

Calling Options

Click = >Intercom > SIP Settings > Calling Options to set the SIP common parameters.

Mode 1: Local Area Network

Note: When the SIP Server is enabled, the Contact List menu are not displayed.

- Calling by IP Address
- Set the IP address on the indoor station, Tap Menu > Advanced > Network > 1. Network > 1. IPv4.

Note: Indoor station IP address and the BioFace C1 device IP address must be in the same network segment.

 Click is icon on the standby page to enter the call page, users can call the IP address of the indoor station.

Calling by Shortcut

- 1. Click = >Intercom > SIP Settings > Contact List.
- Click Add, input device number and call address to add a new contact member. Note: Call address and the BioFace C1 device must be in the same network segment.
- 3. Click SIP Settings > Calling Shortcut Settings, select any item except admin, and enter the form information you just uploaded.
- 4. Then you can enter the device number or click shortcut key in the call screen to directly implement the video intercom.

Direct Calling Mode

- 1. Click = >Intercom > SIP Settings > Contact List.
- Click Add, input device number and call address to add a new contact member. Note: Call address and the BioFace C1 device must be in the same network segment.
- 3. Click SIP Settings > Calling Shortcut Settings > Call Mode > Direct Calling Mode > Add. Select the IP addresses of the indoor stations that you want to call, then the indoor stations will be displayed in the list.
- 4. Then you can tap the icon on the device to call the indoor stations at the same time.

Mode 2: SIP Server

- 1. Click ≡ >Intercom > SIP Settings > Local Settings to enable the SIP server.
- Click Master Account Setting/Backup Account Setting to set the SIP server parameters.
- 3. Click icon on the standby page to enter the call page, once the SIP is set up correctly, a green dot will appear in the upper right corner of the call page to indicate that the BioFace C1 device is connected to the server. You can call the account name of the indoor station.

Note: When users need to enable SIP server, they need to purchase the server address and password from the distributor, or build the server confidently.

13 Connect the Wireless Doorbell 🛧

This function needs to be used with the wireless doorbell.

First, power on the wireless doorbell. Then, press and hold the music button, for 1.5 seconds until the indicator flashes to indicate it's in pairing mode. After that, click on the BioFace C1 device icon 💿, if the wireless doorbell rings and the indicator flashes, it means the connection is successful.

BioFace C1

Wireless Doorbell

After a successful pairing, clicking the icon of BioFace C1 device will ring the wireless doorbell.

Note: Generally, each BioFace C1 device connects to 1 wireless doorbell.

14 ONVIF Settings

This function needs to be used with the Network Video Recorder (NVR).

- 1. Set BioFace C1 device to the same network segment as the NVR. Click 😑
- 2. >Intercom > ONVIF Settings to set the User Name and Password.

Note: If the Authentication function is disabled, then there is no need to input the User Name and Password when adding the device to the NVR.

 On the NVR system, click Start > Menu > Channel Manage > Add Channel > Refresh to search for the BioFace C1 device.
