Compatible With
ZSmart App

Introduction

TL700 is designed as a childproofing fingerprint smart door lock with a built-in doorbell. Users do not need to worry if the kids have unlocked the door from inside the house and wandered outside. Because of the doorbell integration, users do not need to deploy an extra doorbell. What's more, thanks to the Class C cylinder design and mortise protection, even if this lock is damaged from the outside, your home is still safe.

TL700W supports Wi-Fi communication and is compatible with ZSmart APP. This Wi-Fi lock can unlock remotely, share a password, trace the unlocking record and manage users via smartphone. It is an ideal door lock management solution for apartments and private houses.

Scenarios

With the assurance knob feature, you never have to worry about your child wandering away from home

In presence of a doorbell function, users inside the house will immediately get notified when visitors press the doorbell

With the Class C cylinder protection, even the outdoor unit of the lock is damaged, your home is still safe

Remote Control Via ZSmart App
