Product Overview

ProMA series is an advanced standalone terminal that unifies multi-biometric authentication, RFID, and integrated video intercom into one rugged device. Its aluminum alloy chassis achieves IP67 waterproof and dustproof, and reaches IK07 vandal resistance, delivering dependable security in all-weather environments.

Three models for Every Security Need:
• ProMA: facial authentication + fingerprint + RFID + palm (optional).
• ProMA-RF: facial authentication + RFID + palm (optional).
• ProMA-QR: facial authentication + QR code (dynamic/ static) + RFID +palm (optional).

ProMA series authenticates users in under 0.35 seconds and supports up to 30,000 facial templates, 50,000 RFID credentials, and expandable biometric template storage (facial templates: up to 50,000 ; fingerprint template: 10,000). Optional palm authentication adds up to 5,000 templates, ensuring rapid throughput during peak traffic.

What sets ProMA series apart is its dual camera 2MP WDR imaging delivers superior facial authentication in backlighting and lowlight conditions. Its ONVIF and SIP protocol compatibility enables seamless video intercom, realtime visitor screening, and remote door release in a single device. Also, ZKTeco PUSH integration connects to ZKBio CVSecurity for centralized security management.

ProMA series eliminates the need for multiple hardware units and reduces installation complexity for your access control infrastructure across corporate buildings, campuses, logistics hubs, and residential communities.

Core Capabilities

High Durability and Operates in All-Weather Conditions
High-strength aluminum alloy casing with IK07 vandal resistance,
IP67 waterproof and dustproof rating.

Data Security
Deploys the AES 256-bit algorithm encryption to protect data storage. The ProMA series also secures communication between the server and the web client through HTTPS / TLS1.2 encryption.

Unified Access and Attendance Integration
Integrate with ZKTeco's ZKBio CVSecurity for access control and security management. Dual PUSH integration: ZKBio CVAccess (Access Control) via AC PUSH or ZKBio Time (Time & Attendance) via TA PUSH—user-selectable deployment mode.

Supports Video Intercom
Video Intercom (SIP Protocol Ver. 2.0) Indoor Monitor: VT07-B22L, VT07-B26L-W
Software: ZKBio CVSecurity, BioTalk Pro.
Supports ONVIF (Compatible with Profile S/T/G/C/Q/A) to integrate with third-party network video recorder (NVR).

Embedded Web Server for Centralized Configuration
Manage ProMA series configuration via embedded web server, providing a centralized device configuration with no software installation required. Configure network settings, cloud services, video intercom setup and mobile credential (only for ProMA-QR) through the intuitive web-based dashboard.

Multiple Biometric Authentication Methods
Multiple biometric authentication methods: Facial authentication, Fingerprint authentication, Palm authentication (optional), QR Code (dynamic/static) and RFID.
Compatible with multiple RFID reader modules supporting up to 100 + card types, including:
-125 kHz: ID / HID Prox / HID iclass.
-13.56 MHz: IC/DESFire EV1 / EV2, HID iClass, LEGIC.
Supports dynamic and static QR code as secure mobile credentials via ZKBio CVSecurity App for contactless authentication.
